

## Higher Pressure Stripe Removal Systems Improve Your Bottom Line

### BENEFITS

- Higher pressure allows for more rapid marking removal
- Productivity increases up to 300% compared to 40,000 psi systems
- Lower water consumption rate reduces downtime for water replenishment
- Highest nozzle rotational speed in the industry
- Seamless upgrades available for your current equipment

### Higher Pressure Increases Productivity

Flow's 55,000 psi ultrahigh-pressure (UHP) technology increases your productivity and improves your bottom line. Higher pressure means increased stripe removal rates. Additionally, you can count on low water consumption rates of only 6 ½ gpm, allowing less downtime for water replenishment. As a result, you are able to remove road markings at a remarkable pace. In fact, stripe removal rates for your truck or robot can increase up to 300% as compared to 40,000 psi equipment using a similar flow rate.

### Fan Jets — More Efficient Stripe Removal

Higher pressure does not come at a detriment to the surface you are maintaining. Flow's patented 55,000 psi Fanjet nozzles can quickly and efficiently remove road markings without damaging the underlying surface. Our time proven 3,000 rpm head assembly provides the highest nozzle rotational speed in the industry, ensuring rapid stripe removal. Full conversions are available for single or dual head assemblies.

### Upgrades and Retrofits

Flow can upgrade all of your ultrahigh-pressure components on your Waterjet Stripe Removal System while maintaining all existing controls and read-out capabilities of your equipment. Let Flow provide you with a complete retrofit service for all of your UHP components including: pump unit, head assembly, controls, valves, nozzles, hoses, tubing, gauges, and more. This package also includes complete safety, operational, and maintenance training by a certified Flow service technician at your jobsite.

Flow has over three decades of experience assisting customers in making the right choices for their ultrahigh-pressure needs. We pride ourselves on giving you a variety of choices, the appropriate solution for your application, and confidence in your investment you can count on. At Flow, we are committed to innovating reliable systems that improve your bottom line.

We offer 55,000 psi jobsite conversion demonstrations on ANY existing UHP system. Let Flow show you the benefits of higher pressure!

# Waterjet Stripe Removal System Powered by Flow's HUSKY® 55,000 psi Pump

### Specifications

- Operating Pressure: 55,000 psi (3,790 bar)
- Maximum Flow Rate: 6.5 gpm (24.5 lpm)
- Approximate Weight: 5575 lbs (2534 kg) dry
- Fuel Capacity: 82 gal (310 l)
- Engine: 290 hp (216 kW) Caterpillar C-9
- Nozzle Horsepower: 210 nhp (157 kW) continuous duty
- Speed: 2,100 rpm continuous duty
- Water Filtration: 10 micron absolute
- Mounting Type: Skid or optional trailer mount

### The HUSKY 55,000 psi Pump

Designed for power, and built to last, Flow's 55,000 psi HUSKY pump will exceed your expectations. Our HUSKY pump has set the new industry standard for both productivity and reliability, providing you with a portable ultrahigh-pressure waterjet pump that offers the highest pressures available.

### INNOVATION | EXPERTISE | COMMITMENT

#### Get It All with Flow

For over three decades, Flow has set the standard for excellence in waterjet technology. We are the only waterjet company in the world that offers total solutions and support from a single source, both before and after your waterjet system is installed. We learn your business requirements. We help you select and implement the right solution. We train your staff and we are there for you for the entire lifecycle of our products.

#### When you partner with Flow, you get more than a product:

Our **INNOVATION** ensures that you will always have the latest and highest quality technology.

Our **EXPERTISE** ensures that you will always have the right technology for your individual business needs.

Our **COMMITMENT** to customer service ensures that you will always receive the support you need to stay productive.

For your complimentary needs analysis or a product demonstration, please call one of our waterjet experts at **1-800-446-3569**.

We look forward to partnering with you in your success.
