

waterjet connect™

IoT ENABLED

Waterjet performance **data** and **insights** delivered to your fingertips.

Take the guesswork out of productivity and let your waterjet data drive your decisions with Waterjet Connect, Flow's waterjet-specific IoT solution. With Waterjet Connect, you'll get accurate and timely information about your system whenever you want it.

How Does it Work?

Waterjet Connect communicates with your waterjet system(s) to relay the data from your system into easily understandable charts and graphs from which to base decisions from. Your data tells a story about the performance of your system, maintenance, and operation. Waterjet Connect proactively monitors your pump health and performance using advanced algorithms, matched with sensor technology, to allow simple prediction of when maintenance may be coming due for your system and more.

Real-Time Stats

View total pump hours plus scalable and customizable hour-by-hour usage graphs.

Be Proactive

Maximize uptime by proactively managing maintenance intervals.

Access From Anywhere

The FlowGo secure customer portal is accessible from anywhere – tablet, desktop, and mobile devices.

Reduce Downtime

Help eliminate unscheduled downtime while protecting your waterjet investment and improving performance.

Predictable Performance | Predictable Maintenance
Automated Alerts | Profitable Results

flowgo.flowcorp.com

FlowGo is where you go to view your Waterjet Connect data and dashboards.

Visualize performance, monitor your system health, and easily share data with your team, in one simple-to-use portal.

- At-a-glance easy to read metrics, charts, and data
- Customize and filter your data
- Identify trends
- Order parts
- Secure portal access
- Easily add users
- View your data from your desktop, tablet, or phone
- Export your data to CSV files
